BOAT-SCHOOL ECODIESEL UNIVERSITY EXTENSION PROJECT: PLANNING AND IMPLEMENTATION

Abstract: The extension project Barco-Escola Ecodiesel, developed by students and teachers of chemical engineering course of Instituto Superior Tupy (IST), aims a environmental conscience to young students of Joinville public schools, concerned to a suitable method to discard the post-used cooking oil. The wrong oil discard through sink drainpipe in the kitchen causes water pollution of oceans and rivers, affecting the marine live. The present article has the objective of relating the planning and development process of the project activities, as well as the main obtained results. During the project, lectures of environmental conscience have been carried out in several schools, emphasizing the impact caused by the unsuitable oil discard and motivating the oil recycling to product biodiesel and soap bars. In 2012, 1985 students and teachers of public schools were attending by the project and 519 persons of this group participated of a boat ride along to babitonga bay in order to show the importance of nature preservation.

Keywords: Extension project. Cooking oil discard. Environmental conscience.

AGRADECIMENTOS

A Revista do Instituto Superior Tupy agradece a todo o grupo de consultores ad hoc pela valiosa colaboração emprestando-nos sua significativa experiência.
